Overview

I am an MCA student with strong skills in Java, Spring Boot, Python, and web development. I've built projects like a Face Recognition Attendance System, an Online Job Portal, and a Hospital Management System using technologies such as Django, MySQL, and OpenCV. I understand core concepts like Data Structures, OOPs, and Databases. I'm currently looking for a full-time role as a Java Developer or Backend Developer where I can apply my skills, work on real-world projects, and continue learning in a practical environment.
